

UI/UX Architecture Blueprint: Financial Afrik (Final Comprehensive Version)

This document provides a complete reverse-engineered design system, layout structure, and technical animation specification based on [Financial Afrik](#).

1. Design System (Visual Style)

The design system follows a **classic editorial aesthetic** combined with modern digital news elements. It prioritizes readability and information density.

Color Palette

Role	Color (Hex/RGB)	Usage
Primary	#DD0017 (Red)	Call-to-action buttons, category labels, accents.
Background	#FFF0E8 (Cream)	Main page background, providing a "paper" feel.
Text (Primary)	#444444 (Dark Gray)	Body text and secondary headings.
Text (Heading)	#000000 (Black)	Main article titles and section headers.
Accent	#FFFFFF (White)	Text on primary buttons, card backgrounds.

Typography

- Headings:** IBM Plex Serif, Georgia, serif. Used for a professional, authoritative editorial feel.
- Body/UI:** Inter, system-ui, sans-serif. Used for high legibility in dense information areas.
- Scale:**
 - H1: 35px (Bold, Serif)
 - H2: 24px (Bold, Serif)
 - Body: 14px (Regular, Sans-serif)

- Metadata: 11px (Uppercase, Sans-serif)
-

2. Page-Specific Layout Structures

A. Homepage (The Hub)

- **Hero Ticker:** A horizontal scrollable row of "Latest News" cards at the very top.
- **Main Feature:** A 2/3 width main feature area paired with a 1/3 width sidebar.
- **Categorized Grids:** Sections like "Espace PME et Fintech" use a 3-column grid of cards.
- **Vertical Lists:** "En Continu" uses a vertical list with images on the right.

B. Category Pages (Finance, Leaders, Secteurs)

- **Header:** Large category title with a brief description.
- **Grid Layout:** A 2-column grid of article cards (Image top, Title middle, Excerpt bottom).
- **Sidebar:** Consistent sidebar with Newsletter, Kiosque, and Agenda widgets.

C. Financial Afrik TV (Video-Centric)

- **Video Grid:** A 2-column grid of large video thumbnails with play icon overlays.
- **Metadata:** Category labels (e.g., "FINANCIAL AFRIK TV") are highlighted in red.

D. Article Page (Reading Experience)

- **Breadcrumbs:** Home > Category > Title for easy navigation.
 - **Content Column:** 2/3 width column for the article text, optimized for readability.
 - **Social Sidebar:** A vertical floating bar of social share icons.
-

3. Technical Animation Specification

The site uses a set of consistent animations to enhance interactivity and provide visual feedback.

Navigation & Links

- **Nav Link Hover:**
 - **Effect:** Color shift from dark gray/black to **Primary Red**.
 - **Duration:** 0.25s .

- **Easing:** ease-in-out .
- **Property:** all (primarily color).
- **Dropdown Menus:**
 - **Effect:** Smooth fade-in and slide-down.
 - **Duration:** 0.3s .
 - **Easing:** ease-out .

Micro-Interactions

- **Image Hover (Fade):**
 - **Effect:** Opacity reduction to 0.85 .
 - **Selector:** .ts-img-hov-fade .wp-post-image:hover .
 - **Duration:** 0.3s (standard transition).
- **Image Hover (Zoom):**
 - **Effect:** Subtle scale increase (approx. 1.05x).
 - **Duration:** 0.4s .
 - **Easing:** ease-in-out .
- **Button Hover:**
 - **Effect:** Slight darkening of the red background or increase in box-shadow.
 - **Box-Shadow:** rgba(0, 0, 0, 0.16) 0px 2px 7px -4px (initial state).

Global UI Animations

- **Hamburger Menu (Mobile):**
 - **Effect:** Slide-in from the left.
 - **Transform:** translateX(-370px) to translateX(0) .
 - **Duration:** 0.4s .
 - **Easing:** ease-in-out .
- **News Ticker:**
 - **Effect:** Continuous horizontal scroll.
 - **Implementation:** CSS animation with linear timing for constant speed.
- **Search Overlay:**
 - **Effect:** Full-screen fade-in.
 - **Duration:** 0.3s .

- **Opacity:** 0 to 1 .
- **Lightbox (Zoom-in):**
 - **Effect:** Scale and translate from initial position to center.
 - **Keyframes:** 0% { transform: scale(var(--wp--lightbox-scale)); } 100% { transform: scale(1); } .

4. Reusable UI Component Library

Buttons

- **Primary Action:** Red background, white uppercase text, 2px radius.
- **Secondary/Ghost:** Transparent background, red or black border/text.

Cards

- **News Card (Horizontal):** Small thumbnail (left/right) + Title + Date.
- **Feature Card (Large):** Full-width image + Overlay or bottom-aligned title.
- **Grid Card:** Top image + Category label + Title + Excerpt.

5. Responsive Design Rules

Breakpoint	Layout Behavior
Desktop (>1024px)	Full 3-column layout (Main + Sidebar + Secondary Sidebar/Widgets).
Tablet (768px - 1024px)	2-column layout. Sidebar moves below main content.
Mobile (<768px)	Single column. Navigation collapses into Hamburger.

6. Flexible UI Architecture

- **Slot-based Sections:** Containers that accept any component as a child.
- **Theming via CSS Variables:** Use variables for --primary-color , --bg-color , and --font-family .

- **Component-Driven Development:** Build the UI as a library of independent components.
